

EDUCATIONAL DESIGN FOR TECHNORAMA AND PHAENO

## The leading European Science Center

Experience the joy of science: with exhibits, furnishings and design advice, we support one of the most successful and popular learning centers in Switzerland.

Under the management of its director Remo Besio, Technorama developed into what it is today: a world of knowledge and an astounding experience for visitors.

Thanks to experience with Technorama, Erdmann Design was able to win the international design competition for Phæno's corporate communication in Wolfsburg, Germany.

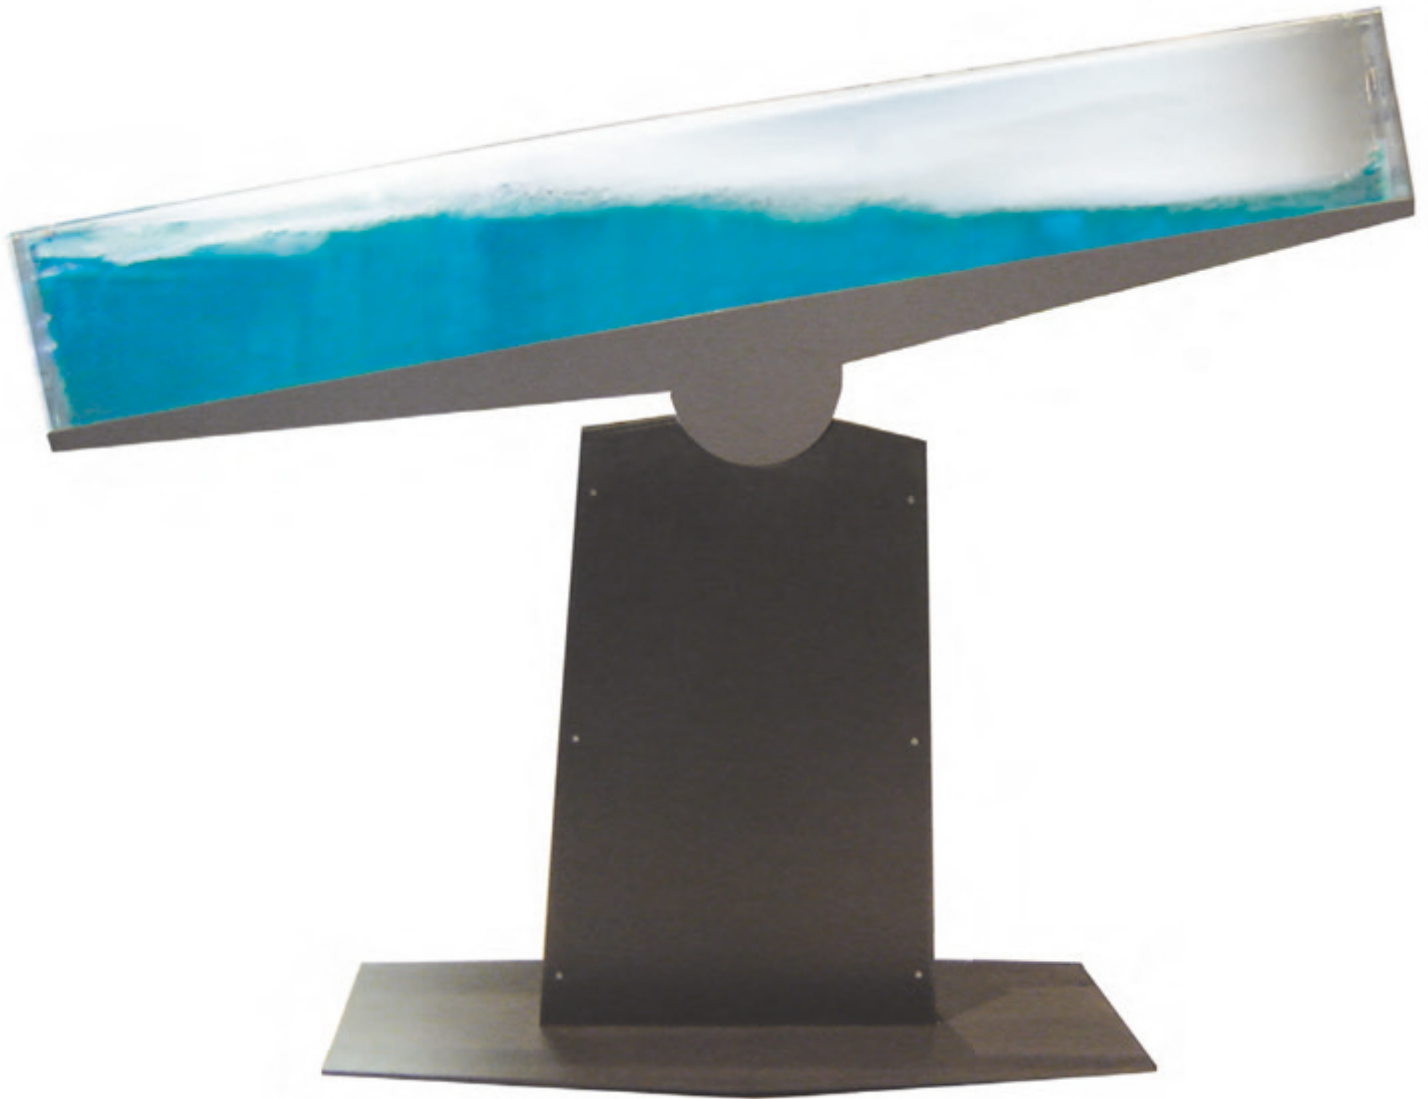

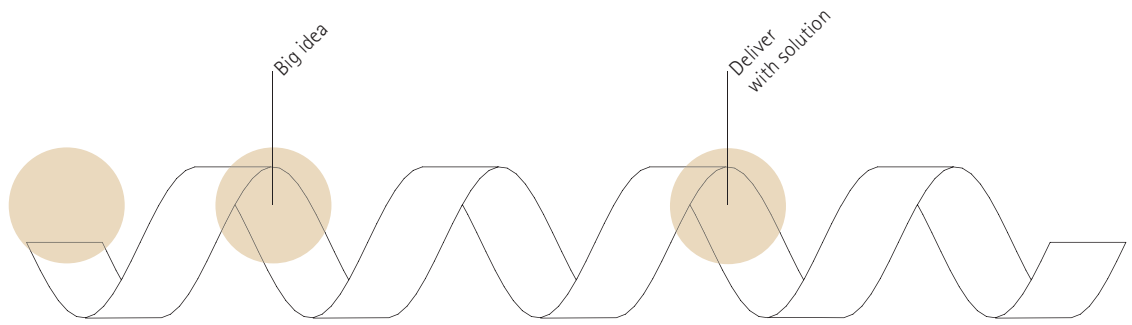

Pleasure of discovery for people of all ages.

Technorama, founded in 1974, was originally intended as an industrial museum. With its conversion into an educational adventure park, the design of the various learning stations also became the focus of attention.

At an early stage, design studies were done in cooperation with the Technorama specialists to develop different exhibits for special exhibitions and furnishings.

Inspiring and functional design is characteristic of the fascinating experimentation and experience stations at the Technorama.

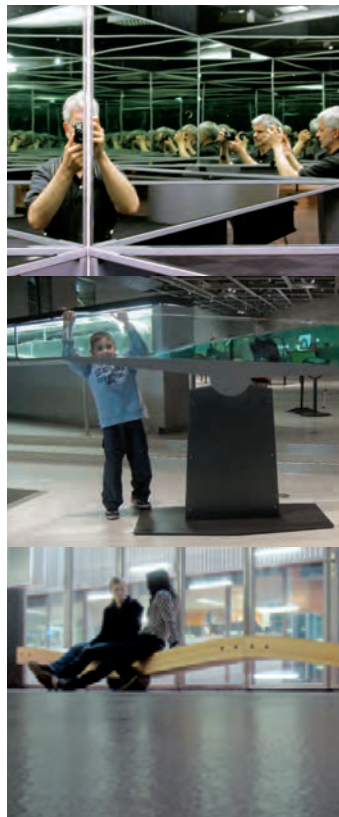

Project since 1984

Sub-projects:

- Reconstruction architecture
- Themed exhibitions
- Cooperation with researchers
- Exhibit projects
- Event planning
